

State Direct Health Services

Community Health (775-887-0417)

Nevada's Community Health Centers (CHC) are private, not-for-profit, consumer-directed health care corporations which provide high quality, cost-effective and comprehensive primary and preventive care to medically underserved and uninsured people. **Health center services are not free.** However, to ensure that income or lack of insurance is not a barrier to care, patients who are not covered by public or private insurance are charged on a sliding fee scale according to income. CHC services generally include primary care visits; health education; disease screening and control; case management; laboratory services; dental care; pharmacy services; substance abuse counseling; and social services.

Early Intervention Services (EIS) North and South (800-522-0066)

Are providing early intervention, diagnostic, treatment, and follow-up services to families with children who have known or suspected developmental delays, or are at risk of becoming developmentally delayed, in the areas of cognition, communication, physical development, social/emotional development, and adaptive skills.

WIC (Women, Infants, and Children) (800 8 NEV WIC or 800-863-8942)

WIC is a short-term food and nutrition program designed to help mothers and their children who are in need. The focus of the WIC program is to improve the health of Nevada women, infants and children who are eligible for the program by providing supplemental nutritious foods, nutrition education, and other health and social services. Visit the WIC webpage for further information.
